## SUMMARY

I'm Nihad Adnan Shah, a passionate Computer Science graduate specializing in web development. With a keen interest in AI and Machine Learning, I actively seek opportunities to expand my skills. I enjoy connecting with diverse industries. Feel free to reach out at [nihad.adnan.shah@g.bracu.ac.bd](mailto:nihad.adnan.shah@g.bracu.ac.bd) for any inquiries or discussions.

## SKILLS

**Languages:** Python, Java, C++, JavaScript

**Styling:** HTML, CSS, Tailwind

**Framework:** React, NumPy, Node JS, Express JS

**Database:** MySQL, MongoDB

**Problem Solving:** 50+ problems on various online judges

## PROJECTS

**Technologies:** **Casa Catalyst** [casaCatalyst.com](https://casaCatalyst.com)  
• MERN  
• JWT  
• Redux  
Casa Catalyst is a comprehensive MERN stack app for real estate, facilitating direct property transactions. It seamlessly integrates Google authentication, ensuring convenient and secure sign-up processes. With a diverse range of features, it enhances user experience.

**Technologies:** **Watch Wonders** [watchWonders.com](https://watchWonders.com)  
• React JS  
• Node JS  
• MongoDB  
• Express JS  
Watch Wonders is a cutting-edge MERN stack e-commerce platform tailored for watch enthusiasts. Seamlessly manage your cart with ease, and enjoy secure payment options, including card and cash on delivery. Keep track of your orders effortlessly while experiencing a sleek and intuitive interface.

**Technologies:** **Sentiment Analysis Using NLP** [github.com/NihadAdnan/SentimentAnalysis](https://github.com/NihadAdnan/SentimentAnalysis)  
• NumPy  
• Pandas  
Sentiment Analysis From Textual Data Using NLP, Leveraging Natural Language Processing (NLP) to explore the intricate art of decoding sentiments within text.

**Technologies:** **Weather Detection** [WeatherDetection.com](https://WeatherDetection.com)  
• JavaScript  
• Web API  
'Weather Detection', where I've harnessed the power of JavaScript to create a dynamic and responsive weather-tracking system. This innovative application provides real-time weather updates, leveraging APIs and user-friendly interfaces.

**Technologies:** **House Price Prediction** [github.com/NihadAdnan/HousePricePrediction](https://github.com/NihadAdnan/HousePricePrediction)  
• NumPy  
• Matplotlib  
'House Price Prediction' - a cutting-edge project focused on unraveling the intricacies of real estate.

## EDUCATION

2020 - 2024	<b>BRAC University, Dhaka</b> BSc in Computer Science <b>CGPA: 3.65/4.0</b>	University
	<b>Thesis:</b> Detecting Different Stages of Alzheimer's Disease from MRI Images using Deep Learning and Computer Vision Techniques	
2018	<b>Cantonment Public School and College, Rangpur</b> Higher Secondary Certificate <b>GPA: 4.83/5.00</b>	College
2016	<b>Police Lines School and College, Rangpur</b> Secondary School Certificate <b>GPA: 5.00/5.00</b>	School
