SUMMARY

I'm Nihad Adnan Shah, a passionate Computer Science graduate specializing in web development. With a keen interest in AI and Machine Learning, I actively seek opportunities to expand my skills. I enjoy learning and connecting with diverse industries. Feel free to reach out at nihad.adnan.shah@g.bracu.ac.bd for any inquiries or discussions.

SKILLS

Languages: Python, Java, C, JavaScript, NodeJS

Styling: HTML, CSS

Framework: React, NumPy, Scikit-learn, EJS

Database: MySQL, MongoDB

Problem Solving: 50+ problems on various online judges

PROJECTS

Technologies:
- MERN
- Tailwind
- JWT
- Redux

Casa Catalyst   casaCatalyst.com
Casa Catalyst is a comprehensive MERN stack application designed for real estate purposes. It offers users the ability to buy or rent properties directly through the website. Additionally, Casa Catalyst integrates Google authentication for streamlined sign-up processes, ensuring convenience and security for users. The platform incorporates a wide range of features to enhance user experience and facilitate efficient property transactions.

Technologies:
- React JS
- Node JS
- MongoDB
- Express JS

Watch Wonders   watchWonders.com
Watch Wonders is a cutting-edge MERN stack e-commerce platform tailored for watch enthusiasts. Seamlessly browse and purchase premium timepieces, manage your cart with ease, and enjoy secure payment options, including card and cash on delivery. Keep track of your orders effortlessly while experiencing a sleek and intuitive interface.

Technologies:
- NumPy
- Pandas

Sentiment Analysis Using NLP   github.com/NihadAdnan/SentimentAnalysis
Sentiment Analysis From Textual Data Using NLP, Leveraging Natural Language Processing (NLP) to explore the intricate art of decoding sentiments within text.

Technologies:
- JavaScript
- Web API

Weather Detection   WeatherDetection.com
'Weather Detection', where I've harnessed the power of JavaScript to create a dynamic and responsive weather-tracking system. This innovative application provides real-time weather updates, leveraging APIs and user-friendly interfaces to deliver accurate and visually appealing information.

Technologies:
- NumPy
- Matplotlib

House Price Prediction   github.com/NihadAdnan/HousePricePrediction
'House Price Prediction' - a cutting-edge project focused on unraveling the intricacies of real estate.
